Preparing the Wrenchead Parts Catalog Interface

This add-on interface allows access to the Wrenchead aftermarket parts cataloging for various manufacturers.

For more information go to the WHI Solutions, Inc. website at **www.whisolutions.com**. After acquiring your Nexpart subscription, select **Interface Settings** from the **Options** menu and configure one of the 'Other Estimating System' options to access the Wrenchead **Catalog**.

Once the integration option has been selected, go to **Options** / **Preferences** and **Other Settings**. In the **Tool Bar Options** area, scroll down the list of options to place on the AutoShop tool bar and click on the **Wrenchead** option. Click on the **Up** button to bring that option to the top of the list. Click **OK** to save changes. This will change the tool bar to have the Wrenchead button appear on the **Tool Bar**. You may click on the button to launch into your parts supplier window or to set up a warehouse.

Setting Up Your Parts Suppliers in AutoShop

Prior to using the Wrenchead interface you may need to **setup your Warehouse(s)** and appropriate **login password**. You can however complete these settings the first time you launch the Wrenchead Interface from AutoShop.

To set up a parts supplier in AutoShop, you will need to:

Click on **Add Warehouse**.
Select **Default Warehouse** for the warehouse you get most of your parts from.
Enter in the **Warehouse Name**, **User Name** and **Password**into the appropriate fields. This information will be provided to you from Wrenchead or your parts supplier.
Click on **Save Settings**.
Click the **Close** button once the settings have been saved.
